

DROUGHT: WATER LEVELS ARE AT THEIR LOWEST

I ACT FOR WATER,
I ACT FOR US,
I ACT NOW.

Residents, professionals and visitors,
let's adopt simple eco-friendly actions now
to preserve what matters most.

1 IN THE SHOWER

I limit
the number
of showers
I take
each week.

I turn off
the water
while
soaping up.

I collect
the cold water
while waiting
for hot water,
to use it for
another purpose
(beach rinse,
cleaning, toilet
flushing...).

I limit
my shower
time to
4 minutes
maximum.

To be even more
responsible,
I use a washcloth
and wash
myself at
the sink.

2 AFTER THE BEACH

I use a basin of water
to rinse my feet
and the whole family's
swimwear.

3 LAUNDRY & DISHES

I only run my machines
(laundry, dishes...)
when they are full.

I wash my beach towels
only after several
swims.

I use the dishwasher
instead of
washing by hand.

I use 2 basins for washing
my dishes: 1 for washing,
1 for rinsing. Under no
circumstances do I leave
the tap running.

**EVERY
DROP
COUNTS!**

Simple actions, real water savings
today and a better future
for our region tomorrow.
